THIAA Botanical Combination

Understanding the Potential Areas of Adverse Effects

Potential adverse side effects

Some approaches mask or alleviate pain and inflammation by blocking certain enzyme activities in the body. This may cause discomfort and serious adverse effects to the stomach, intestines, liver, kidneys, joints, bones, and immune and circulatory systems.

A higher degree of safety

Laboratory tests show that a THIAA botanical combination effectively addresses the root causes of inflammation without the potential risks of directly blocking certain important enzyme activities. Now you can get comfortable relief for pain without potential serious adverse effects.

*THIAA is tetrahydro-iso-alpha acids from hops (*Humulus lupulus* L.).

Pain relief shouldn't cause more pain

With extended use, common pain relievers may cause stomach discomfort and changes in mood, sleep, energy, or weight. But more concerning are the possibilities with extended use of certain products for liver or kidney damage, stomach ulcers or bleeding, stroke, heart attack, further joint damage, and osteoporosis.

Get relief that works with your body

This THIAA botanical combination is comprised of research-based, natural ingredients. It's designed to help reduce inflammation and pain without the potential adverse effects associated with common pain relievers.

In fact, clinical studies and safety research suggest this formula works with your body to help calm the underlying causes of your joint pain without upset to many of the body systems that make other pain relievers potentially harmful. This combination of hops derivatives and other natural ingredients has been safely recommended for everyday use by healthcare providers worldwide with no reported serious adverse effects.

Like some other plant- or food-based ingredients, a THIAA combination formula is not recommended for individuals taking anticoagulants (e.g., warfarin or heparin), as it can amplify the blood-thinning effects of these medications. Please discuss all medications and supplements with your healthcare provider.
